DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to a labeled proteinoid microsphere, classified in class 424, subclass 9.3.
 - II. Claims 7-22, drawn to a labeled proteinoid microsphere, classified in class 435, subclass 7.1.
2. Inventions I and II are independent and distinct inventions. Invention I requires the proteinoid comprises a mixture of amino acids that are condensed and Invention II does not require this limitation. Invention II requires a selective binding moiety and Invention I does not require this limitation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for one group is not required for other restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
